

Ronak Sakariya

Full Stack Developer

+91-9724951522 | ronaksakariya01@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Vite, ShadCN UI, Material UI, Redux, Axios, React Router DOM, Next.js

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Multer, Cookie-Parser, CORS

Database: MongoDB, Mongoose, Supabase, Row Level Security (RLS)

Tools and Platforms: Git, GitHub, Docker, Nginx, Postman, Vercel, Render, Cloudinary, Razorpay, VS Code

EXPERIENCE

Full Stack Developer

March 2025 – May 2026

Axivolve, Remote

- Built SMART-DPR, a voice-driven reporting system using **Web Speech API** for speech-to-text and **Google Sheets API** for automated site progress tracking.
- Implemented **LLM**-based command parsing to convert unstructured voice inputs into structured spreadsheet entries, reducing manual data entry.
- Architected complete backend for multiple applications using Node.js, Express.js, MongoDB, and Mongoose with clean MVC structure — controllers, models, and RESTful API routes.
- Built and integrated responsive React.js frontend interfaces for multiple applications, consuming internal REST API endpoints to deliver dynamic, data-driven user experiences.

Frontend Developer Intern

June 2024 – January 2025

BITNET Infotech, Rajkot (On-site)

- Designed and implemented end-to-end authentication flow (Login and Signup) for TIGIHR using React.js, delivering a seamless onboarding experience for candidates and recruiters.
- Integrated REST APIs using Axios and managed global application state with Redux, enabling real-time job listing updates and consistent data flow across the platform.
- Debugged and resolved UI and UX issues across multiple pages and implemented fully responsive layouts using Tailwind CSS and Material UI, ensuring cross-device consistency.

PROJECTS

MERN Stack E-Commerce Platform

[Live Demo](#) | [GitHub](#)

- Built a production-ready MERN e-commerce platform with separate customer, admin, and Express API applications using React, Express, MongoDB Atlas, and JWT authentication with HTTP-only cookies.
- Implemented core commerce features including category/search/sort filters, **per-size inventory** tracking, guest-user cart merging, saved addresses, and end-to-end order management.
- Integrated **Razorpay**, Cloudinary uploads, JWT **refresh-token rotation**, and secure cross-origin authentication.
- Developed an admin dashboard for product and order management with CRUD, multi-image uploads, and order status updates using scalable MVC architecture and reusable React components.

GigFlow - Smart Lead Management Dashboard

[Live Demo](#) | [GitHub](#)

- Built a full-stack MERN dashboard using React 19, TypeScript, layered backend architecture, JWT auth via HTTP-only cookies, and role-based access control (admin/sales) across 4 **protected** routes.
- Implemented debounced search, multi-parameter filtering, server-side pagination, and **CSV** export for lead management.
- Built 8+ reusable React components with TypeScript type safety using Zod schema validation and React Hook Form, along with centralized Express error handling.
- Containerized the app using **Docker** and Docker Compose with React, Express, MongoDB, and Nginx, and published Docker images to Docker Hub.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

Shri Labhubhai Trivedi Institute of Engineering and Technology, Rajkot

Graduated: 2025

CGPA: **8.34** / 10
