TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Vite, ShadCN UI, Radix UI, Redux, Axios, React Router DOM, Lucide React, Next.js

Backend: Node.js, Express.js, REST API Design, JWT Authentication, bcrypt, Multer, Cookie-Parser, CORS

Database: MongoDB, Mongoose, Supabase, Row Level Security (RLS)

Tools and Platforms: Git, GitHub, Vercel, Render, Cloudinary, Razorpay, VS Code

EXPERIENCE

Frontend Developer Intern

June 2024 – January 2025

BITNET Infotech, Rajkot (On-site)

- Designed and implemented end-to-end authentication flow (Login and Signup) for TIGIHR using React.js, delivering a seamless onboarding experience for candidates and recruiters.
- Built dynamic candidate onboarding forms using React Hook Form with client-side validation, enabling efficient multi-field data collection and submission handling.
- Integrated REST APIs using Axios and managed global application state with Redux, enabling real-time job listing updates and consistent data flow across the platform.
- Debugged and resolved UI and UX issues across multiple pages and implemented fully responsive layouts using Tailwind CSS and Material UI, ensuring cross-device consistency.

PROJECTS

Full-Stack MERN E-Commerce Platform | React.js, Node.js, Express.js, MongoDB

[Live Demo](#) | [Github](#)

- Built a full-stack MERN e-commerce application with customer storefront, admin dashboard, Express.js REST API, and MongoDB database, deployed on Vercel and Render.
- Implemented JWT authentication with HTTP-only cookies, refresh token rotation, role-based access control, and protected routes for customer and admin users.
- Integrated Razorpay payment gateway with server-side order creation, HMAC SHA-256 webhook signature verification to prevent payment tampering, and automated inventory deduction triggered only on confirmed successful payments.
- Developed admin dashboard with Cloudinary image uploads, per-size stock management, product CRUD operations, and order fulfillment status management using React.js.

GigFlow — Smart Lead Management Dashboard | React.js, Node.js, Express.js, MongoDB

[Live Demo](#) | [Github](#)

- Developed a lead management dashboard using React and TypeScript, implementing CRUD operations and role-based access control that supported secure user authentication across 4 protected routes.
- Built server-side filtering with debounced search, multi-parameter queries across 3 filter categories, and CSV export functionality, reducing unnecessary client-side data rendering.
- Architected 8+ reusable UI components with form validation using Zod schemas and React Hook Form, achieving end-to-end type safety and reducing form-related bugs across 4 application pages.

GetHired Full-Stack Job Portal | React.js, Supabase, Tailwind CSS, ShadCN UI

[Live Demo](#) | [Github](#)

- Built a full-stack job portal with React.js and Supabase, implementing Email Auth, JWT session persistence, Row Level Security, and role-based access control for candidates and recruiters, deployed on Vercel.
- Developed end-to-end candidate workflow including job search with location and type filters, PDF resume upload to Supabase Storage, and a real-time application status tracking dashboard.
- Built recruiter dashboard featuring job posting management, applicant review panel, hiring pipeline status updates, and secure resume access via Supabase signed URLs.

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

Shri Labhubhai Trivedi Institute of Engineering and Technology, Rajkot

Graduated: 2025

CGPA: **8.34** / 10
